DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/22/09 has been entered.

Information Disclosure Statement

2. The information disclosure statement(s) (IDS) submitted on 5/22/09 has been received and made of record. Note the acknowledged form PTO-1449 enclosed herewith.

Specification

3. The disclosure is objected to because of the following informalities:
The "Reference to Pending Prior Applications" needs to be updated to provide the patent numbers for the applications that have been issued.
Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 8, 9, 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Claim 8 has been amended to recite that the "membrane is tethered to the inner surface of the valve seating retaining ring" and "the membrane being expandable against the inner surface". The limitations render the claim indefinite as it is unclear as to how the membrane is both tethered and expanded against the inner surface. The examiner suggests amending the claim to recite that a portion of the membrane is tethered to the inner surface and that the remaining portion of the membrane is expanded against the inner surface.

Allowable Subject Matter

8. Claims 8, 9 and 11-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

9. Applicant's arguments with respect to claims 8, 9 and 11-13 have been considered but are moot in view of the new ground(s) of rejection.
